

Touch ID Prerequisites:

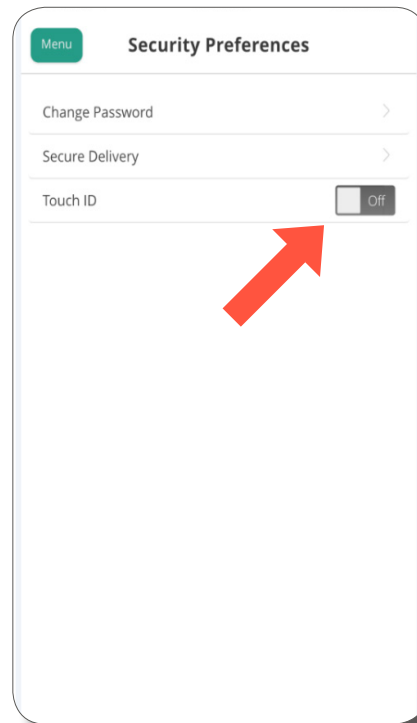

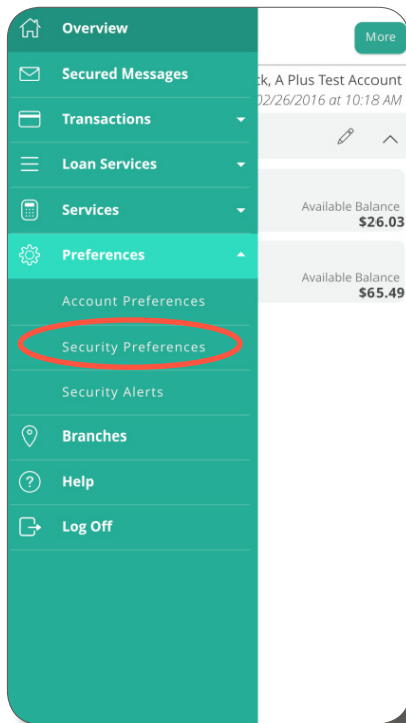

- Hardware & Software
 - iOS 8 or later
 - iPhone 5S
 - iPhone 6
 - iPhone 6 Plus
 - Latest generation iPad enabled with Touch ID
- You must set up Touch ID Finger Print from within the iOS.
Go to → **Settings | Touch ID | New Touch ID** on the device to set this up.
 - **Note:** Only one (1) Touch ID is permitted per device. Multiple users cannot use Touch ID on the same device even if they have different logins/accounts.

Setting up Touch ID Authentication within the App:

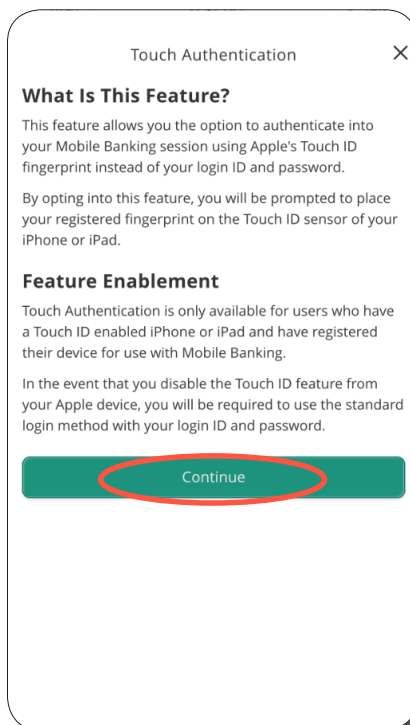

1. Login to the application and select **Menu**.

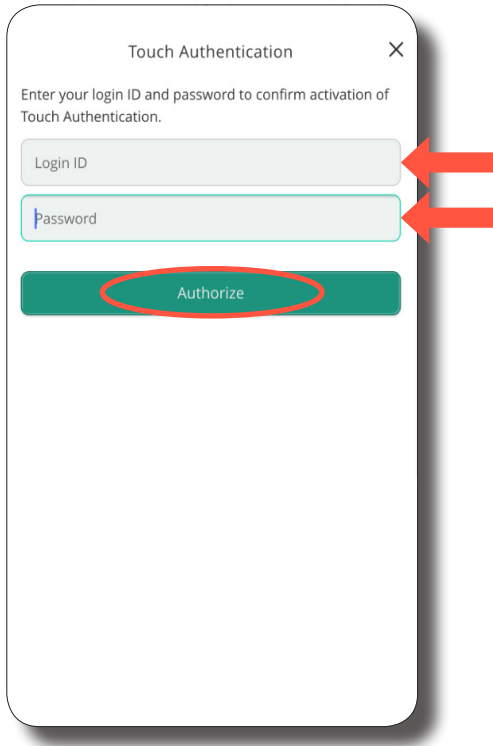

2. Navigate to **Preferences**, select **Security Preferences** and enable the Touch ID toggle.

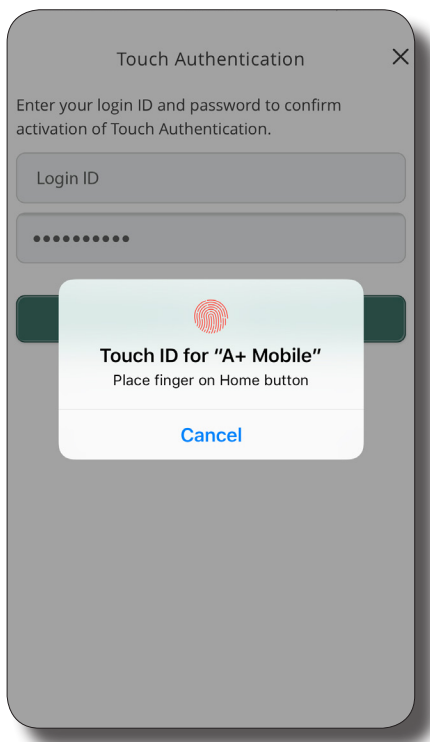

3. View the feature description and click **Continue** to enable it.

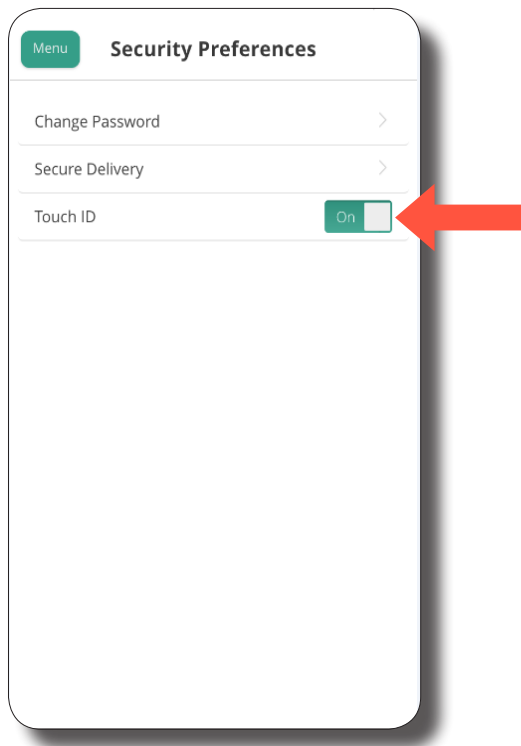

4. Re-enter your login credentials and click **Authorize**.

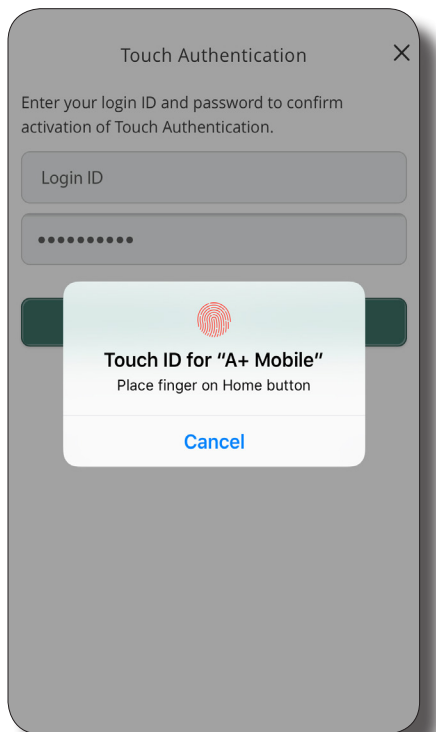

5. On the next prompt, **hold your finger over the Touch ID button on the device.**

6. Once accepted, you will be taken back to **Security Preferences** where the Touch ID toggle will be on.

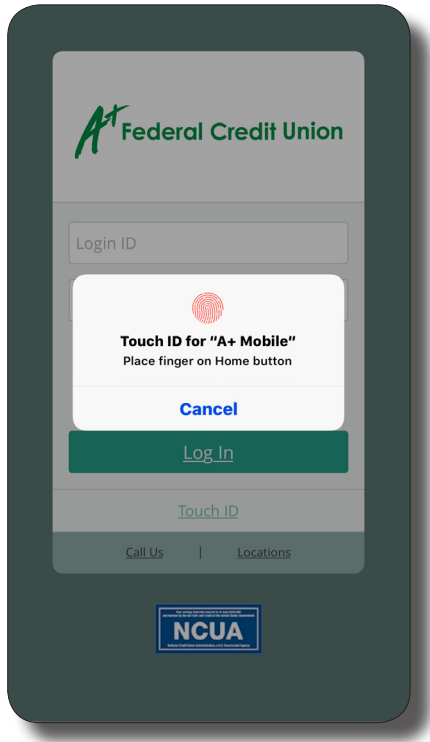

7. Test the Touch ID authentication by logging out and logging back in. **Hold your finger over the Touch ID button on the device to log in.**

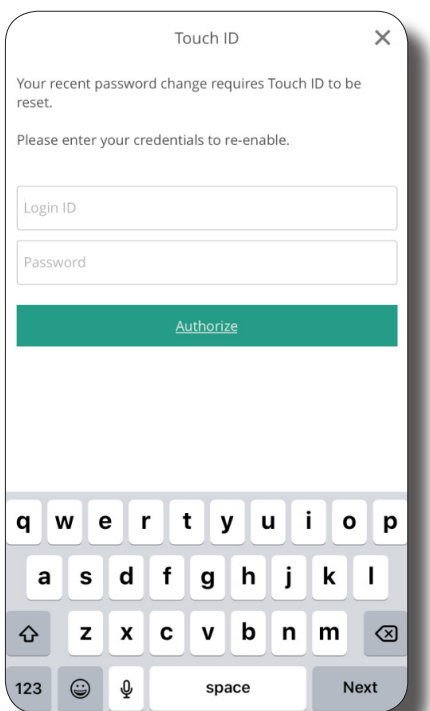

When changing your online banking password, you will need to re-set your Touch ID Authentication:

1. From the app, hold your finger over the Touch ID button on the device.

2. Enter your login ID and new password. Click **Authorize**.

3. You will receive a Touch ID Enabled message to show you were successful and then you will be taken into your account.
